

# WHAT IS AN Environmental Planner?

A Water Resources Environmental Planner plays a critical role in managing and conserving water resources whilst ensuring the protection and preservation of the environment.

## What does the day-to-day look like?

- Analysing and assessing the impact of water-related projects on the environment
- Working collaboratively to develop sustainable water management strategies and assess water availability
- Reviewing environmental regulations and policies to ensure compliance
- Developing and maintaining databases
- Preparing reports, impact assessments and management plans

## What skills do you need?

- Ability to identify and solve gaps in information and knowledge
- Ability to co-ordinate projects and organise workload
- Data literacy - the ability to manage, interpret and present data effectively
- An analytical and problem-solving approach
- An interest in protecting the environment and sustainable water use

If you have an interest in becoming an Environmental Planner we can provide you with all the on-the-job training and support you need to thrive.
