

WHAT IS A

Water Resources Officer?

(Graduate Role - Agriculture)

A graduate role as a Water Resources Officer (agriculture) is an exciting opportunity to contribute, learn and develop. Over the first 4 years of this role, we will support you as you work towards gaining chartered status of a professional institution.

What does the day-to-day look like?

- Working on revising the National Framework for Water Resources
- Collaborating and working effectively in a national team to shape water resources planning for agriculture
- Examining the effects of climate change and population growth on the demands from agriculture
- Investigating how farmers can improve their water supply resilience

What skills do you need?

- An environmental degree and/or experience in water resources work
- Ability to co-ordinate projects and organise workload
- Great communication skills
- Ability to be able to work effectively and collaboratively with others
- An interest in protecting the environment and sustainable water use

Starting salary range (depending on experience)

£28,100 - £30,258

If you have an interest in becoming a graduate Water Resources Officer, we can provide you with all the on-the-job training and support you need to thrive.
